# Simulation of the Ising model Complex Systems Simulations Project 1 

John Doe (CBEHKD)

## Contents

1 Introduction ..... 1
2 Materials and Methods ..... 1
3 Results and discussion ..... 1
3.1 This is a subsection ..... 2
3.2 This is another subsection ..... 2
4 Conclusion ..... 2

## 1 Introduction

I can easily cite a website [1], or any articles [2], see the biliographic records in sample.bib. The records in sample.bib were downloaded automatically using a referencer, it would be hard to type them in by hand! Url references need sometimes hand-editing, though.
We recommend using EndNote or Mendeley, where you can export bibliographic records into the BibTex format.

If there is a reference that you would not like to cite in the text, but would like to include in the bibliography, use the nocite command.

## 2 Materials and Methods

Here comes the theoretical background and the algorithms, ideas you used. Take a look at Fig 2, where a nice caption and a cross-reference is used.

## 3 Results and discussion

What to do if I'd like to include Table 3?

Figure 1: Schematic view of the Ising model. Ising model schematic figure on a rectangular grid; blue arrows represent +1 , red arrows represent -1 spins.

| Color | Meaning |
| :--- | ---: |
| blue | +1 |
| red | -1 |

Table 1: Summary of color codings.

### 3.1 This is a subsection

### 3.2 This is another subsection

## 4 Conclusion
